## Welcome to the EDGE

[What we do](#) | [Why help EDGE species](#) | [What are EDGE species?](#)

### DISCOVER

Meet some of the World's most extraordinary species on the edge of existence

### OUR COMMUNITY

Join an exciting community wanting to raise awareness of EDGE species

### TAKE ACTION

Help support EDGE species today. See how you can help save them from extinction

## About EDGE

The EDGE of Existence programme highlights and conserves one-of-a-kind species that are on the verge of extinction.

We have scored the world's mammals and amphibians according to how Evolutionarily Distinct and Globally Endangered (EDGE) they are. The top 100 in each group are highlighted [here](#).

These are the world's most extraordinary threatened species – frogs that give birth through their skin and mammals that are immune to cyanide – yet most are unfamiliar and not currently receiving conservation attention.

Help conserve nature's most amazing animals. Find out how [here](#).
